

Sairaj Bhandalkar

Data Science & Machine Learning Intern

+91 8010088093 — sairajbhandalkar61@gmail.com — Pune, Maharashtra — LinkedIn — GitHub
Immediate Joiner

Professional Summary

BCA graduate with hands-on experience in data science, machine learning, and Python development. Proficient in Python (NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn), SQL, EDA, and building end-to-end ML models using regression, classification, and clustering techniques. Experienced in creating data visualizations and deploying AI solutions via Flask and Streamlit. Eager to apply analytical thinking and ML expertise to drive data-driven business decisions.

Key Skills

Programming & Libraries: Python, SQL, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, TensorFlow, Keras, Flask, Streamlit, OpenCV

Machine Learning: Regression, Classification, Clustering, ANN, CNN, NLP, TF-IDF, Feature Engineering, Model Evaluation & Tuning

Analytics & Tools: EDA, Data Cleaning, Data Preprocessing, Data Visualization, Dashboards, Power BI, Git, Jupyter Notebook, MySQL

Professional Experience

Bluestock Fintech

Feb 2026 – Mar 2026

Python Developer Intern

- Developed and tested Python-based application features, automating 3+ business workflows and improving processing efficiency by approximately 30%.
- Gathered, cleaned, and structured data from multiple sources, ensuring data quality and integrity for downstream analysis and reporting.
- Maintained detailed documentation of workflows and code logic using Git and GitHub, adhering to software development best practices in a collaborative team setting.

SevenMentor Pvt. Ltd., Pune

2025 – Present

AI/ML Engineer Trainee

- Built end-to-end ML models using regression, classification, and clustering techniques, improving model accuracy through systematic feature engineering and hyperparameter tuning.
- Performed exploratory data analysis (EDA) and data cleaning on real-world datasets, identifying key patterns and trends that guided model development and business insights.
- Developed and deployed AI applications using TensorFlow, Keras, Flask, and Streamlit, creating interactive dashboards and visualizations to communicate findings clearly to stakeholders.

Projects

AI-Powered College Assistant Chatbot

Python, Flask, Scikit-learn, TF-IDF, NLP

- Built an NLP-based chatbot using TF-IDF vectorization and intent classification, automating resolution of student queries with over 85% accuracy on test data.
- Integrated the trained model with a Flask web interface, enabling real-time responses and creating clear documentation of the system architecture and model pipeline.

Smart AI Real-Time Monitoring System

Python, OpenCV, Deep Learning, CNN

- Designed and deployed a real-world deep learning monitoring solution using OpenCV and CNN models, achieving automated activity detection with optimized inference speed.
- Analyzed live video data streams to extract patterns, generated alert reports, and maintained documentation of model performance and system scalability.

Education

Bachelor of Computer Applications (BCA)

2022 – 2025

Adarsh Mahavidyalaya, Vita

CGPA: 7.6/10

Relevant Coursework: Machine Learning, Deep Learning, Statistics, Data Analytics, DBMS, Data Structures

Certifications

Machine Learning — Artificial Intelligence — Python Programming — MySQL — Power BI — Statistics for Data Science
